hurry my heart | the first solo release from lisa goulder

Rarely there comes along a musical talent that speaks from the heart to all of us. **Lisa Goulder is such an artist.**

A singer/songwriter of uncanny depth both lyrically and melodically, Lisa has assembled an outstanding collection of ten of her uniquely original songs and the result is her first solo album, entitled **Hurry My Heart**.

With the able assistance of **veteran producer Pete Elman** she has fashioned an album that is at the same time **rootsy and modern**, a gem whose soulful melodies and poignant words linger with the listener beyond the first impression. This is not disposable pop, but mature music delivered with power, urgency and taste.

Featuring a crackerjack rhythm section fronted by the multi-talented Ms. Goulder on piano, the songs sound fresh and spontaneous, and are delivered as if the band was in your living room. Lisa's **deliciously clear and soaring voice** focus the emotion of every track, and the crystalline production affords the luxury of

understatement. With ace guitarist Stef Burns spinning sinewy parts throughout, this is a **CD you can put on again and again** and always hear something different.

Lisa's **jazz roots are evident** in the beautiful **My Favorite Chord**, yet it is her ability to weave a classic melody around a strong lyric that hooks the lucky listener. From the guitar-driven highway song **Driving Lessons** and the rocking **Just You and Me and Your Ego** to the nostalgia of **Guitar Girl**, Ms. Goulder is able to connect with the emotional side. **Hurry My Heart is an album you want to hurry up and check out.**
